

Hanging Christmas houses decorated with Sticky Base and glitter

v15776

Paint these papier-mâché houses for hanging with Plus Color craft paint and leave to dry. Knead Sticky Base with artificial snow and attach onto the houses. Sticky Base works like a glue and may be mixed with different kinds of glitter. Here we have used glitter for a wintery look.

Comment faire

1
Paint the papier-mâché houses with Plus Color craft paint.

2
Push a blob of Sticky Base into fine glitter. Knead thoroughly.

3
Push the Sticky Base mixture onto the house where you want to achieve a frosty look.

4
Mix Sticky Base with slightly coarser glitter and attach the mixture around the door, windows and the roof.

5
Mix glitter strips with Sticky Base and cover the entire roof with this mixture. A tip: you may attach the mixture so that it protrudes over the roof to create eaves covered in snow.

6
Here is the finished house covered with snow.
