

Glass lanterns decorated with glue foil designs

v15803

Decorate these glass lanterns with Christmas designs from deco foil and glue foil designs.

Comment faire

1 Wipe the lantern to remove any fingerprints or similar from the glass. Cut your chosen design free from the glue foil sheet. Remove the protective plastic layer and place the glue foil design on the glass. Rub the glue foil design onto the glass and carefully remove the glue foil sheet with the transferred glue design from the glass.

2 Place a piece of deco foil on top of the glue design and rub on the deco foil gently with your finger. Carefully pull off the deco foil. A tip: if the deco foil has not transferred completely, just repeat the process and rub on some more deco foil where needed.

3 Continue until the lantern has achieved the desired look.
