

Elves made from wooden discs with a Silk Clay elf's hat

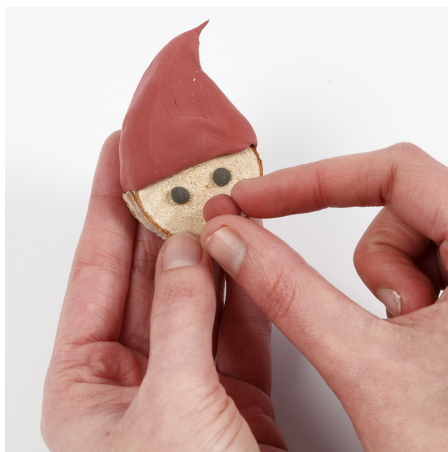

v15712

Make these elves from wooden discs glued together with Sticky Base and decorate them further with Silk Clay. Tie a piece of natural hemp around the joint for the scarf.

Comment faire

1
Model a blob of Silk Clay around one part of the wooden disc intended for the elf's head. Model an elf's hat.

2
Model two small eyes and a nose from Silk Clay. Gently press them onto the wooden disc, making sure they keep their shape. A tip: As long as the Silk Clay is moist, it will stick to wood, papier-mâché etc. If the Silk Clay is drying out, then add a small amount of water to make it stick again.

3
Attach two small wooden discs for buttons onto the wooden disc intended as the elf's tummy with Sticky Base. Stick the two large wooden discs together (the head and the tummy) using Sticky Base.

4
Tie a small piece of natural hemp around the joint for the scarf.
