

A woven Christmas star with a rose bud

v15994

Weave paper stars with rose buds in different sizes depending on the width of the paper star strips. Begin by weaving the Christmas star following steps 10-12 on the packaging. Make a rose bud in the middle of the star by gathering all four paper star strip ends, twisting them into the shape of a rose. Insert the ends of the paper star strips into the bottom of the star one by one and trim.

Hoe werkt het

1 Follow steps 1-12 on the packaging. See idea No. 1331. Now weave the back of the woven star using the short paper star strips.

2 Bend the paper strip into a soft curve and feed the end into the opening in the square in front. Pull and tighten to form a triangle. Repeat this procedure with the remaining three paper strips, resulting in a pyramid peak.

3 The finished back. Turn the star over.

4 Gather the four long paper strips on the front.

5 Wrap the gathered bundle of paper strips around as shown in the photo. Adjust the lengths of the paper strips, turning the middle into a delicate rose.

6 Feed each paper strip through diametrically as shown in the photo.

7 Repeat with all four paper strips. Feed the next strip into the opening underneath the rose on the star as shown in the photo. Trim all the paper strips.

8 Use the rose-shaped stars as decoration on this year's Christmas table.
