

Sculptures from mixed clay

v16140

Make sculptures from self-hardening clay, Silk Clay and Foam Clay. Mix the various types of clay for a unique look, you are only limited by your imagination. Self-hardening clay dries completely within approx. 24 hours. Foam Clay and Silk Clay dry completely within an hour, depending on the size of the piece.

Hoe werkt het

1 Begin by modelling some basic shapes from self-hardening clay. Leave to dry for approx. 24 hours before the next step. A tip: avoid cracks in the self-hardening clay by kneading well. Smooth out any cracks that may appear using water.

2 Decorate the self-hardened clay figures with Silk Clay and Foam Clay that stick straight onto the clay. We have rolled balls in different colours and have attached them directly onto the figure.

3 Here is another example of a sculpture where we have rolled small sausages in different colours and shaped them like rainbows.

4 Here are different sculptures made with self-hardening clay, Silk clay and Foam Clay.
