

## Paintings with colour mixing

v16370

Here the pupils work with the basic techniques in colour mixing and paint a picture using these techniques. Let them play with the colours first and then paint beautiful pictures with colour areas and prints with string. See the technique here! TARGET GROUP: Infants/lower juniors (preschool-Y3) and juniors (Y4-Y6)

### *Hoe werkt het*

- 1** Let the pupils experiment with primary colours and mix colours on paper and card.
- 2** Then paint different, naive symbols, masks, faces and birds that can appear during the colour mix.
- 3** Paint a piece of natural twine with black paint and place it carefully on top of the painted base. Either choose a specific shape or arrange the twine randomly.
- 4** Remove the twine when the black paint has transferred onto the base.
- 5** Give each pupil a 3D canvas and let them paint a painting based on what they have now learned.
- 6** You may use the colour wheel learning poster to discuss colour mixing, primary colours, complimentary colours, etc.
