

## Kerstdecoratie om zelf te maken

v10541

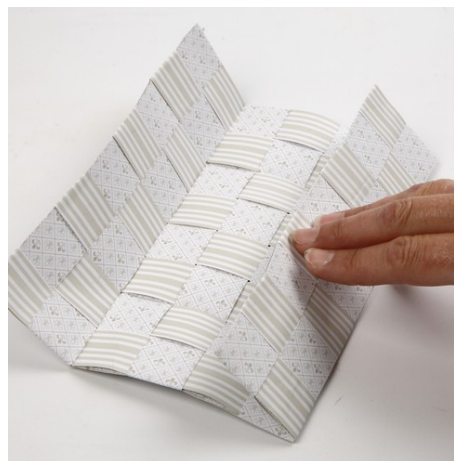

### *Hoe werkt het*

**1** Weave a base using 8 x 8 paper strips. For a basket measuring 11 x 11 cm use the wide paper strips.

**2** Glue as shown in the photo and cut off excess strips.

**3** Fold along the two outer layers of all four lengths.

**4** Punch holes with a Fiskars eyelet setter in all four corners as shown in the photo.

**5** Set eyelets.

**6** The basket gets its shape by gathering all the corners with organza ribbon.
