

Weathercock with Gauze Bandage and Art Metal Paint

v11352

The thick corrugated cardboard, from which boxes for postal packets are made, is well suited for this sculpture. You can choose either a weathercock or a stylistic tulip. See the template for inspiration. Cut out the shape from the corrugated cardboard using a craft knife. Break a flower stick in two. Insert the pointy end into the corrugated cardboard. Cover the cut-out shape with gauze bandage. Paint with Plus Color black. Subsequently patinate the surface by rubbing a small amount of Art Metal silver paint onto the surface. Paint the terracotta pot with Plus Color. Insert the flower stick into clay, plaster or similar in the pot and let it dry.
