

Mug with leaf prints

v11321

The mug is stamped with fresh rose leaves and water-based ceramic paint.

hoe werkt het

1 Find some fresh leaves with distinct ribs. In winter you can use the green leaves of roses. Dab the water-based ceramic paint onto the leaves with a foam sponge. Put on plenty of paint. If you make a mistake when stamping, you can easily remove the paint as long as the paint is wet. When the print is satisfactory, wipe the the excess paint from the mug and then bake in the oven for 30 min. at 130 degrees. The mug should be washed by hand and is not dishwasher-proof.
