

Bremer kerstballen

v11813

Vlechtstroken zijn gebruikt op een nieuwe en spannende manier. De vlechtstroken zijn geregen op sieradendraad met kralen en knijpkralen.

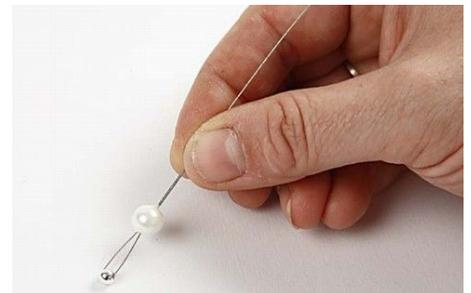

hoe werkt het

1 Cut four or more weaving paper strips to the desired length (min. 15cm long).

2 Cut a hole through the middle with a hand punch and also cut a hole at each end of the strip, approx. 0.5cm from ends.

3 Thread a silver bead onto a piece of wire – thread both ends of the wire through a large bead or more.

4 Now thread both ends of the wire through the middle hole of the strips. Thread on a new bead and a crimp bead and squeeze.

5 Cut off the excess wire – put a crimp bead and a bead onto the wire. Adjust according to the length of the strip and squeeze.

6 Now put the ends of the strips alternately onto the wire.

7 Finish with one or more beads as well as a crimp bead – squeeze. You may vary the length and number of strips as well as the number of beads and amount of decoration.
