

Bloempotten met Plus Color en Mozaiek

v11644

Bloempotten geverfd met Plus Color en kleine tegels van glasmozaiek en later gevoegd.

hoe werkt het

1. Paint the flower pot all over with Plus Color by dabbing lightly with a sponge.

2. Let it dry completely and glue on the mosaic tiles with Paverpol. Attach a piece of foam tape under the bottom row of mosaic tiles to get a straight edge.

3. Glue on a double layer of mirror mosaic tiles as they are thinner than the glass mosaic tiles.

4. Let the mosaic dry completely and apply the mosaic tile grout with a palette knife. Follow the instructions regarding the mosaic tile grout.

5. When dry, wash mosaic tile grout off the mosaic tiles.
