

Plastic kralen op haarspeld

v11919

Het is gemakkelijk om haar accessoires te maken met plastic kralen, elastisch koord of gekleurd elastisch koord. Werk af door na het rijgen van de kralen een knoop te leggen in het gat van de metalen haar speld.

hoe werkt het

1 Thread the beads onto an elastic cord using a large cross stitch needle.

2 Thread the beads onto coloured elastic cord with the brilliant beading needle which is also suitable for small beads. Separate the needle in two and thread the elastic cord through. The needle will fold around the elastic cord.

3 When the beads are on the cord, you may finish by tying the final knot through the hole in the metal hair clips. You have now made lovely hair accessories.
