

## Sleutelhangers van schoenveters

v12184

Een vet coole sleutelhanger gemaakt van een schoenveter met een metalen hanger.

### *hoe werkt het*

**1.** Snørebåndet foldes på midten og bukkes ca. 10 cm tilbage.

**2.** Pull a piece of silver-plated wire through the loop of the lace as shown in the photo.

**3.** Twist the silver-plated wire around the lace and tighten.

**4.** Attach a pendant onto the round jump ring onto and attach the round jump ring onto the shoe lace.

**5.** Start braiding – start where the silver-plated wire is twisted around the shoe lace.

**6.** Always braid to the same side – i.e. always start with the same lace. This results in a twisted braiding. Finish by tying a knot.
