

Kerstgroet met uitgestanste decoraties

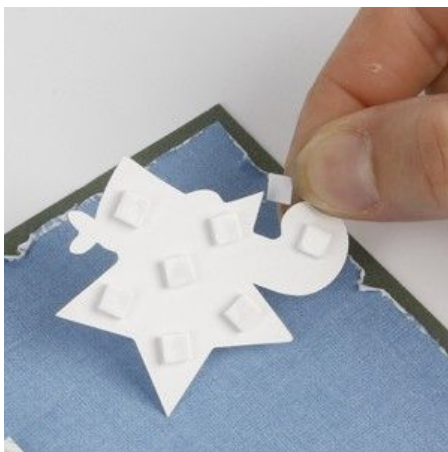

v1379

Een kaart gedecoreerd met Color Bar papier met gescheurde randen. De voorgestante kaartdecoraties zijn bevestigd met 3D foam pads. De kerstgroet is gedecoreerd met stippen gemaakt met een Parel Pen en geruit lint.

Hoe werkt het

1 Cut a piece of paper measuring 12 x 12cm. Tear the edge to achieve a worn look. Attach this piece of paper to the greeting card using double-sided adhesive tape.

2 Attach the stickers. Use 3D foam pads for one of the stickers to create a 3D effect.

3 Use a silver marker pen for making dots.

4 Highlight the dots with a silver Pearl Pen.

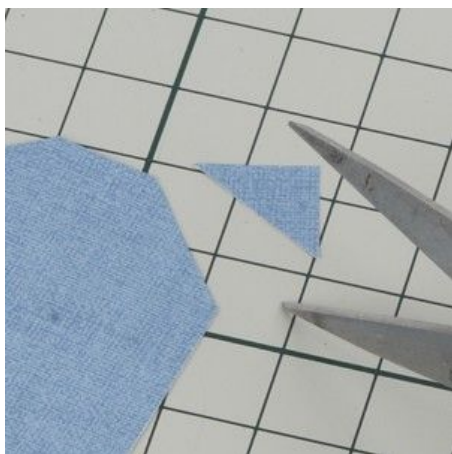

5 Cut a piece of ribbon measuring approx. 10cm.

6 Assemble the ribbon with a brad and attach it to the card with 3D foam pads.

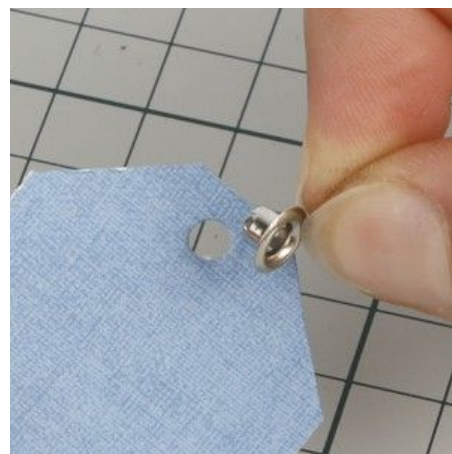

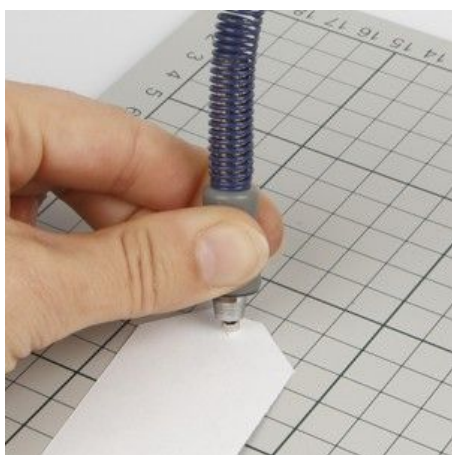

7 Cut off the corners of a piece of paper measuring 4 x 7cm.

8 Punch a hole with an eyelet setter.

9 Insert an eyelet into the hole.

10 Set the eyelet with the eyelet setter and decorate with a silver marker pen, a sticker and ribbon.
