

Technique School: A transferred Design with Fabric Paint

v13683

Transfer printing is a technique where a design on transfer paper is ironed onto a piece of fabric. Here we have used a T-shirt with a design drawn and painted directly onto the transfer paper.

hoe werkt het

1. Paint on the soft side of the transfer paper and leave it to dry.

2. Use a textile marker for drawing a design on the painted surface.

3. Separate the transfer paper from the backing paper. Place the design on top of the fabric with a piece of baking paper on top. Now iron the design, fixing it onto the fabric, setting the iron at a high temperature. NB: The item can now be washed in the washing machine on a gentle cycle at 30°C.
