

## Abstract beeld gemaakt van styropor vormen en papier-maché pulp

v14568

Dit beeld is gemaakt van styropor kegels en ufo's die bijeen worden gehouden met bloemendraad. Daarna is het afgewerkt met papier-maché pulp. Na drogen is het geverf met A-Color acrylverf.

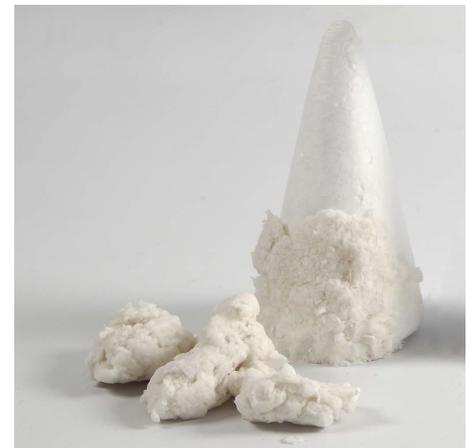

### *hoe werkt het*

**1** Soak papier-mâché powder in water in the ratio: 3 parts powder to 1 part water.

**2** Shorten three stub wires so that each measures approx. 8 cm.

**3** Cover the parts with papier-mâché pulp and assemble them using the stub wires. Cover the joints with more papier-mâché pulp.

**4** Attach the last part onto the top of the figure using a stub wire and push together with more papier-mâché pulp. Leave to dry.

**5** Paint the figure with A-Color acrylic paint and leave to dry. Cut extra stub wires and attach them for eye lashes at the very top.
