

Decoupage op papier-mâché

v15059

Artikelen van papier-maché zijn ideaal om te decoreren met papier. Kies uit transparant papier (servetten, tissuepapier en decoupagepapier) of dekkend papier (glans papier, cadeaupapier etc.) We adviseren decoupagelijm om te plakken.

Hoe werkt het

1 Decoupage with covering paper. It is not necessary to paint the papier-mâché product prior to decoupage (unless you only want the item partially covered with decoupage paper). Apply transparent decoupage lacquer with a brush (a small area at a time). Attach small cut-outs of, for example, glazed paper on top the decoupage lacquer. Smooth with the brush from the middle and outwards to remove air bubbles. Finish with a coat of decoupage lacquer on the entire surface for an even look.

2 Decoupage with transparent paper: We recommend painting dark papier-mâché products with white craft paint prior to decoupage to ensure that colours of the paper stand out as brightly and intensely as possible. Paint with white Plus Color craft paint and leave to dry.

3 Glue cut-out or torn pieces of transparent paper onto the painted surface using decoupage lacquer. The technique is the same as with covering paper. NB: If you choose napkins for your decoupage, only use the top layer of the napkin. Leave to dry.
