

## Hangende katten met kleurrijke buiken

v15255

Deze katten zijn geknipt uit effen karton met behulp van een sjabloon. De cirkels zijn geknipt uit bedrukt karton en aan elkaar geniet om een bal te vormen voor de schattige ronde buikjes.

### *Hoe werkt het*

**1** Cut out a cat from plain card using the template which is available as an attached file on this page.

**2** Cut six card circles, four whiskers and a nose from patterned card. Fold the circles in the middle and staple three together at the time along the fold in the middle. You now have two half baubles.

**3** Glue on the eyes, whiskers and noses on the front and back of the cat. Glue on one of the card half baubles onto the front and the other one onto the back of the cat.

**4** Make a hole with a hole punch at the bottom of the cat body. Feed a pipe cleaner halfway through the hole and twist it for the cat's tail.

**5** Now open out the card circles to give the cat a round body at the front and the back. Attach a string for hanging.
