

## Terracotta tegel met Terrazzo vlokken

v15226

Deze terracotta tegel is gedecoreerd met terrazzo vlokken. Gebruik decoupage lijmlak voor glas en porselein voor het aanbrengen van de terrazzo vlokken.

### *Hoe werkt het*

**1** Apply a generous coat of decoupage lacquer and let it penetrate into the porous tile. Immediately apply another coat on top.

**2** Sprinkle terrazzo flakes onto the wet decoupage lacquer. Only carefully sprinkle a single thin layer onto the wet lacquer.

**3** Pick up individual flakes with the wet brush.

**4** Place the individual flakes strategically. Make it look as natural as possible and not too evenly distributed.

**5** Apply decoupage lacquer on top. Leave it to dry and apply another coat.

**6** For a durable surface, fix the decoupage lacquer in the oven at 130°C for 30 minutes.

**7** You may attach self-adhesive silicone dots onto the back. That way the tile will not scratch table tops when laid flat.
