

DIY kerstkalender met tekeningen, stickers en foto's

v15428

Laat je kind zelf een kerstkalender maken met stickers, kleine tekeningen en foto's. Een fantastisch cadeau om te geven aan bijvoorbeeld opa en oma.

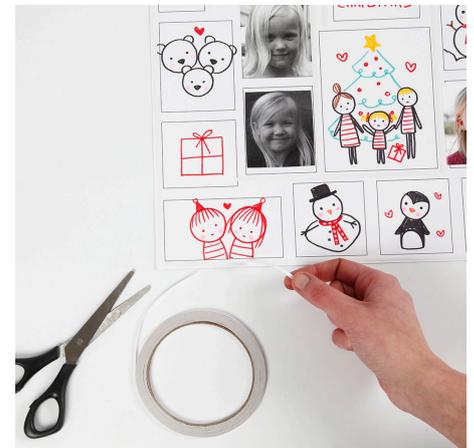

hoe werkt het

1 Decorate the side with the squares (the inside of the calendar). Decorate each square with pictures, drawings and text/greetings etc.

2 Decorate the front with a drawing and numbers – you may use the calendar number stickers.

3 Attach the supplied double-sided adhesive tape along the edges and between the squares and remove the protective layer.

4 Place the front of the calendar on top of the inner side (to stick them together). NB: Don't forget to check that both sides are oriented correctly so that the squares fit.
