

Crochet your own mistletoe

v16076

Crochet your own mistletoe with stalks and tie a crocheted ribbon with a bow around them. The stalks are crocheted using double crochet stitches around a green metal wire allowing them to bend into shape. This mistletoe consists of eight stalks with white berries and a ribbon tied into a bow.

Hoe werkt het

1
Crochet the mistletoe using the crochet pattern which is available as a PDF file at the bottom of this page. Begin the stalk by chaining chain stitches according to your chosen length of the stalk. Tie the yarn end from the start of the chain onto one end of the metal wire. Crochet double crochet stitches through the chain stitches around the metal wire all the way back to the other end of the metal wire (to the yarn end).

2
Crochet leaves either onto the middle of the stalk or at the end by chaining 14 chain stitches. Follow the pattern in the PDF file.

3
Follow the pattern for crocheting the berries. Finish by binding off and feeding the yarn end through the berry and the magic ring. Tighten and sew the berry onto the stalk with the yarn ends.

4

Find inspiration here for different crocheted stalks for the mistletoe.
