Christmas baubles with papier-mâché pulp

v15981

Cover papier-mâché baubles with papier-mâché pulp and decorate them with craft paint in harmonious colours.

Hoe werkt het

1
Mix papier-mâché pulp with water in a 1:3 ratio.

2
Cover a papier-mâché bauble with the papier-mâché pulp, pushing it on firmly.

3
Add texture to the wet papier-mâché pulp using your fingers and/or different kinds of tools. Here we have used a wooden flower stick for adding texture.

4
Hang the baubles when drying, to prevent a flat spot on the bottom.

5
Dab the baubles with craft paint using a sponge or a foam stencil brush. Leave to dry.
