

## Helsinki labelkaart

v11257

Gemaakt van een stuk gevouwen papier. Gedecoreerd met brads en een geponste rand. Labels gemaakt van karton en gedecoreerd met papier en linten.

### *Hoe werkt het*

**1**  
Cut a piece of Vivi Gade Design paper from the series Helsinki size 28x28cm. Fold in half from the bottom up and open the paper again.

**2**  
Fold in half from the left to the right. Open the paper again.

**3**  
Klip i folden ind til midten som vist på foto.

**4**  
Make a fold in the lower right corner. The length is 8cm.

**5**  
Make a fold in the upper left corner. The length is 12x12cm.

**6**  
In the lower right corner attach double-sided adhesive pre-cut strips as shown.

**7**  
Close.

**8**  
Also, attach double-sided adhesive pre-cut strips on the top left corner as shown in the photo.

**9**  
Close.

**10**  
Put on double-sided adhesive pre-cut strips as shown on the photo.

**11**  
Fold over towards the left and press down the side firmly.

**12**  
Punch a border, 16cm in length, from green design card and insert a satin ribbon.

**13**  
Secure the ribbon onto the border with E-Z runner tape. A small strip is enough to keep it in place.

**14**  
Put tape onto the back of the border in the same manner as shown in the photo.

**15**  
Place the paper so that it is turned as shown in photo.

**16**  
Attach the border onto the edge and decorate with brads. Make a small hole with an art knife, attach the brad and push the legs out to each side on the back.

**17**  
Turn the paper and attach the tape as shown in the photo.

**18**  
Fold up the bottom left flap. (This is now the back of the front).

**19**  
Close.

**20**  
Cut a piece of green design card measuring 13x13cm and punch a border along one side. Attach white design card behind it so that a small edge peeps through. Then glue this onto the innerside of the card in order to stiffen the side and in order to have a clean area to write on.

**21**  
Make two tags for the pockets. These measure 6x17cm. Cut off the corners and make hole for a ribbon and fold 6cm from the bottom edge.

**22**  
Tear off the top edge, so you can see the white core of the paper. Tear 2 strips of paper and glue them on underneath. Cut off excess paper along the edge.

**23**  
Glue along the two sides as shown in the photo.

**24**  
Close. Attach a ribbon in the top, insert a note into the pocket if you wish and your tag is now ready to be inserted into the pocket on the front of the card.
