

Een mand voor paaseieren van imitatiestof

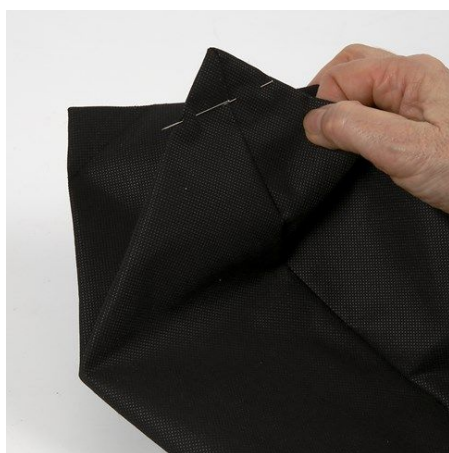

v13559

Deze mand of tas gemaakt van imitatiestof kan gebruikt worden voor eieren of voor broodjes. De mand is gedecoreerd met natuurlijk hennep koord.

Hoe werkt het

1. Cut a 75 x 25cm piece of imitation fabric. Fold the piece lengthwise and sew each side together. Remember that the finished bag must appear with visible visible seams.

2. Turn the sewn piece of fabric, outer side out and sew a small piece horizontally at each corner, so the bag takes shape and can stand on its own at a later stage.

3. Turn the inner side out again. Use a screw punch and punch a series of holes in each side of the lower half of the bag. NB: on the inside of the seam.

4. Squeeze the bag tightly in order to give the finished bag a ruffled look.

5. Fold the top of the bag three times. Tie a small piece of natural hemp in each hole along the sides.
