

Tekening gemaakt met aquarelstiften

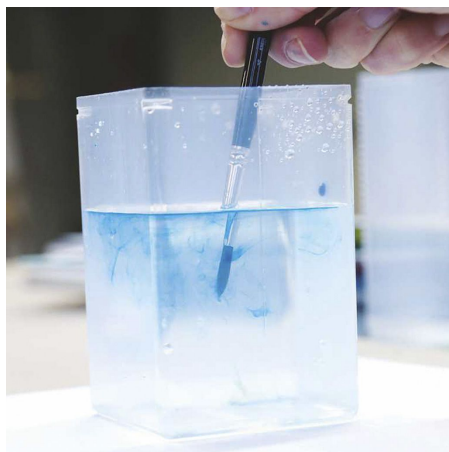

v14702

Deze illustratie is gemaakt op aquarelpapier met SOLO GOYA Aqua Paint Markers. Deze hebben een elastische penseelpunt en een reservoir gevuld met waterverf.

Hoe werkt het

1
This is how you use a SOLO GOYA Aqua Paint Marker: Draw and paint according to your imagination.

2
You may fade the colour by adding water. Use a brush for this.

3
Brush the water over the paint with the brush to spread the colour out. Mix different colours with water to make completely new colours directly on the paper. A TIP: For toning or fading out and for mixing the colours you may use the colourless blender in this series instead of a brush and water.
