

Tekenen op porselein

v15083

Porselein is gemakkelijk te decoreren met stiften. Kies uit verschillende types glas- en porseleinstiften; met vaste vilten punt of met pomp punt alsook dekkende, transparante en glitter. Alle decoraties gemaakt met deze glas- en porseleinstiften moeten worden gefixeerd in een oven.

Hoe werkt het

1
Wipe the porcelain prior to decorating to ensure a non-greasy, clean and dry surface. A glass and porcelain contour marker adds character to the decoration and prevents the paint from the pump action paint markers from running (for example on curved items). Leave to dry.

2
Decorate with glass and porcelain markers. Here we have used opaque pump action paint markers with glitter. Leave to dry for a minimum of 4 hours.

3
Fix the decorated porcelain item in the oven. The fixing time in the oven varies depending on your chosen marker – see the next steps.

4
Fixing of glass and porcelain markers with a solid felt tip: Place in a pre-heated oven (not a fan oven) at 160°C . Fix for 90 minutes.

5
Fixing of opaque glass and porcelain pump action paint markers with glitter: Place in a cold oven. Set the temperature to 160°C (do not use a fan oven). Fix for 30 minutes.

6
Fixing of opaque glass and porcelain pump action paint markers: Place in a cold oven. Set the temperature to 160°C (do not use a fan oven). Fix for 90 minutes.
